

Council of Ministers Responsible for Transportation and Highway Safety

Canada's National Highway System

Annual Report 2010

September 2011

Introduction

Canada's National Highway System is an evolution of the Trans-Canada Highway concept originally launched in 1949. Construction of the Trans-Canada Highway began in 1950 under the authority of the *Trans-Canada Highway Act*. In 1962 Prime Minister John Diefenbaker officially opened the Trans-Canada Highway, although construction continued until 1971. A key goal of the Trans-Canada Highway was to connect all the provinces together by highway, which was pursued through a cost-sharing partnership between federal and provincial governments to upgrade existing roadways to "Trans-Canada" standards. The Trans-Canada highway encompassed 7,821 km of highways spanning the width of the country from Victoria to St. John's.

The National Highway System (NHS) was established in 1988 by the Council of Ministers Responsible for Transportation and Highway Safety. The 24,500 kilometre network of key interprovincial and international highway linkages was identified through a federal-provincial-territorial cooperative study carried out over the period 1988 to 1992.

In September 2004 the Council of Ministers approved the addition of 2,700 kilometres of new routes to the NHS, as a result of a study undertaken by Transport Canada. In September 2005, following a comprehensive review of the NHS by a federal, provincial and territorial Task Force, further expansion of the system to include an additional 11,000 kilometres of routes was endorsed by the Council of Ministers.

In 2010 the National Highway System encompassed over 38,000 kilometres of key highway linkages that are vital to both the economy and to the mobility of Canadians. Over 95 percent of the NHS is owned and operated by provincial and territorial authorities. NHS roads under federal control (mostly roads through national parks and the Alaska Highway) account for about 3 percent of the NHS network and roads under municipal control account for about 2 percent. The federal government is also responsible for two major bridges in Montreal (Champlain and Jacques Cartier), and portions of the Bonaventure Expressway and the Honoré-Mercier Bridge.

The NHS comprises three categories of routes, each of which are defined by specific criteria that can be used to assess route eligibility:

Core Routes

- Key interprovincial and international corridor routes (including links to intermodal facilities and important border crossings)

Feeder Routes

- Key linkages to the Core Routes from population and economic centres (including links to intermodal facilities and important border crossings)

Northern and Remote Routes

- Key linkages to Core and Feeder routes that provide the primary means of access to northern and remote areas, economic activities and resources.

The information contained in the report that follows offers insight to the role played by the National Highway System, its performance, the state of its infrastructure and the investment being made in its restoration and improvement.

The report was assembled using statistical information provided by the federal, provincial and territorial departments of transportation, and while effort was taken to ensure completeness and consistency, it should be noted that data for municipal roads on the NHS was not readily available, and except where explicitly noted, is not included in the summaries.

The content of this report is structured as follows:

- **Part 1** provides an overview of the trends and changes which have occurred with the performance and condition of the National Highway System since 2006
- **Part 2** presents in greater detail the most recent information collected from jurisdictions on the performance and condition of the National Highway System (generally for 2010).
- **Appendix 1** provides a detailed breakdown of the routes contained in the National Highway System as of December 31, 2010

Additional information on the National Highway System, including past reports and studies, can be found on the Internet at www.comt.ca.

Part 2: National Highway System – 2010 Data by Jurisdiction	17
Appendix 1 - National Highway System Route Inventory	24

Highlights – Executive Summary

System Length

- The length of the National Highway System was 38,069 km as of December 2010, essentially unchanged since 2005.

Traffic

- The NHS carries over 125 billion vehicle-kilometers of travel each year, and nearly 20 billion vehicle-kilometers of truck travel.
- Travel on the National Highway System increased 6% from 2005 to 2008.
 - 93% of travel on the NHS occurs on the Core Network.
- Truck travel on the NHS increased 9% over the period.
 - 95% of truck travel occurring on the Core Network.

Safety

- There are over 80,000 collisions per year on the National Highway System, typically resulting in over 500 fatalities and 20,000 injuries annually, however:
 - the number of injuries per year decreased 10% from 2005 to 2008
 - the number of fatalities per year decreased almost 30% from 2005 to 2008.
 - over 82% of collisions on the NHS in 2008 resulted in property damage only.

Canada-US Trade and Tourism at NHS Border Crossings

- Nearly \$300 billion in trade with the United States occurs annually at border crossings on the NHS.
 - from 2006 to 2009 the value of trade at NHS border crossings dropped almost 24%.
 - in 2010 trade rebounded almost 8% over the level reported in 2009.
- The value of tourism at Canada/US border crossings on the NHS remained relatively stable through the period 2006 to 2010 at over \$8 billion per year.

Investment

- Since 2006/07 \$17.4 billion has been invested in the National Highway System:
 - provincial and territorial governments ~ \$14.4 billion (83%)
 - federal government ~ \$2.5 billion (14%)
 - other sources ~ \$0.5 billion (3%)
- Over this period investment by NHS route category has been as follows:
 - Core Network ~ 90%
 - Feeder Network ~ 7%
 - Northern and Remote Network ~ 3%
- In fiscal year 2010/11 nearly \$4 billion was invested in the National Highway System, a decrease of about 13% from the previous year.

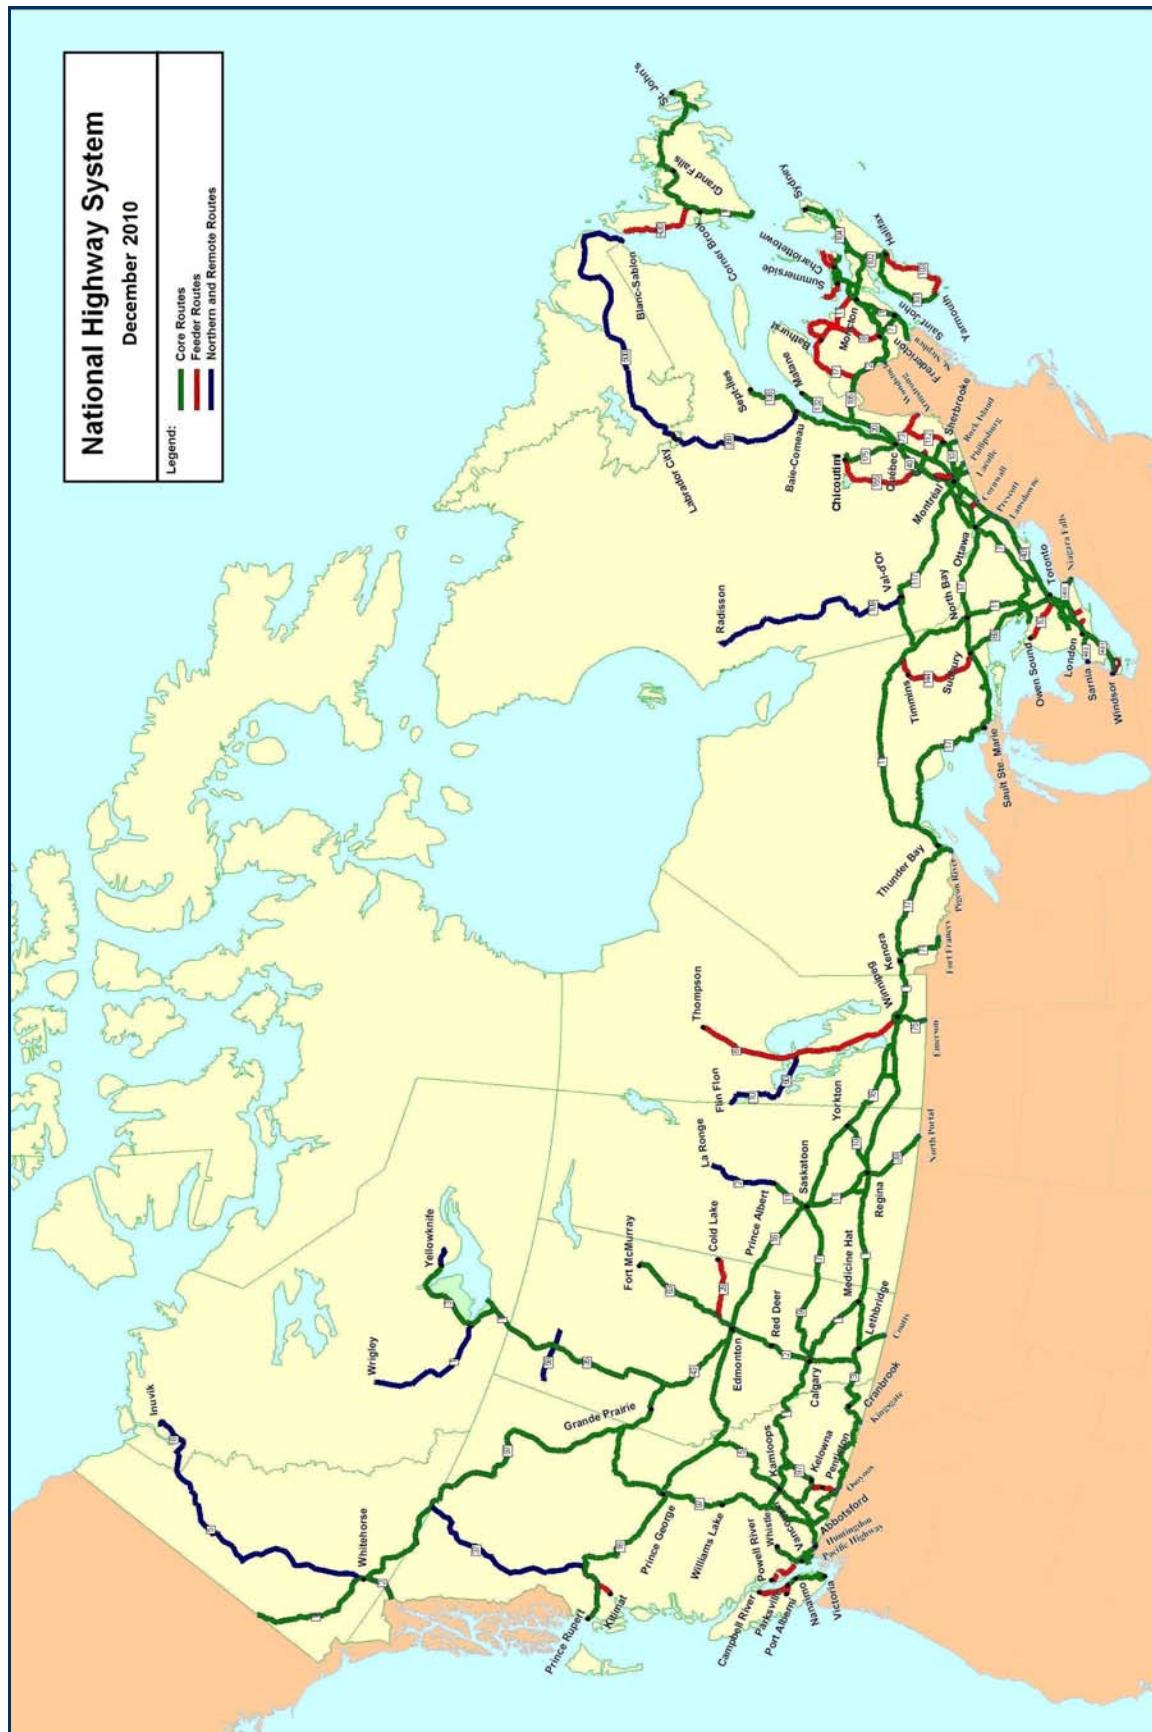

Pavement and Road Surface Condition

- Since 2006 the length of the NHS with pavement condition rated as “good” has increased by 2600 km (12%).
- The length with pavement condition rated as “poor” has decreased by 800 km (22%).
- The length of unpaved NHS has decreased by over 800 km (24%).

Bridges and Structures

- There are over 8700 bridges on the National Highway System
 - 60% of bridges on the NHS are over 30 years old
- The number of bridges which are less than 10 years old increased 16% from 2006 (896) to 2010 (1,223).
- The number of bridges which are over 50 years old increased over 50% from 2006 (870) to 2010 (1,318).
- Since 2007 almost 700 bridges on the NHS are new or have undergone major rehabilitation.

System Map

Part 1: Developments and Highlights 2006-2010

a) System Length and Route Inventory

Network Length (km)

	2006	2007	2008	2009	2010
Core	27,613	27,631	27,625	27,601	27,656
Feeder	4,493	4,495	4,496	4,492	4,493
Northern/Remote	5,922	5,921	5,917	5,917	5,920
Total	38,026	38,047	38,038	38,010	38,069

Highlights:

- The length of the National Highway System has not changed significantly since a major review and expansion was approved by the Council of Ministers in 2005.
- Adjustments have been made annually in the length of the network due to:
 - Changes in route alignments resulting from construction
 - Changes in route segments included in the NHS when bypasses are completed
 - Corrections to route segment lengths resulting from new measurements.
- Since 2006 the distribution of routes within the three NHS categories has remained relatively unchanged:
 - Core Network ~ 73%
 - Feeder Network ~ 12%
 - Northern and Remote Network ~ 15%

b) Traffic and Travel

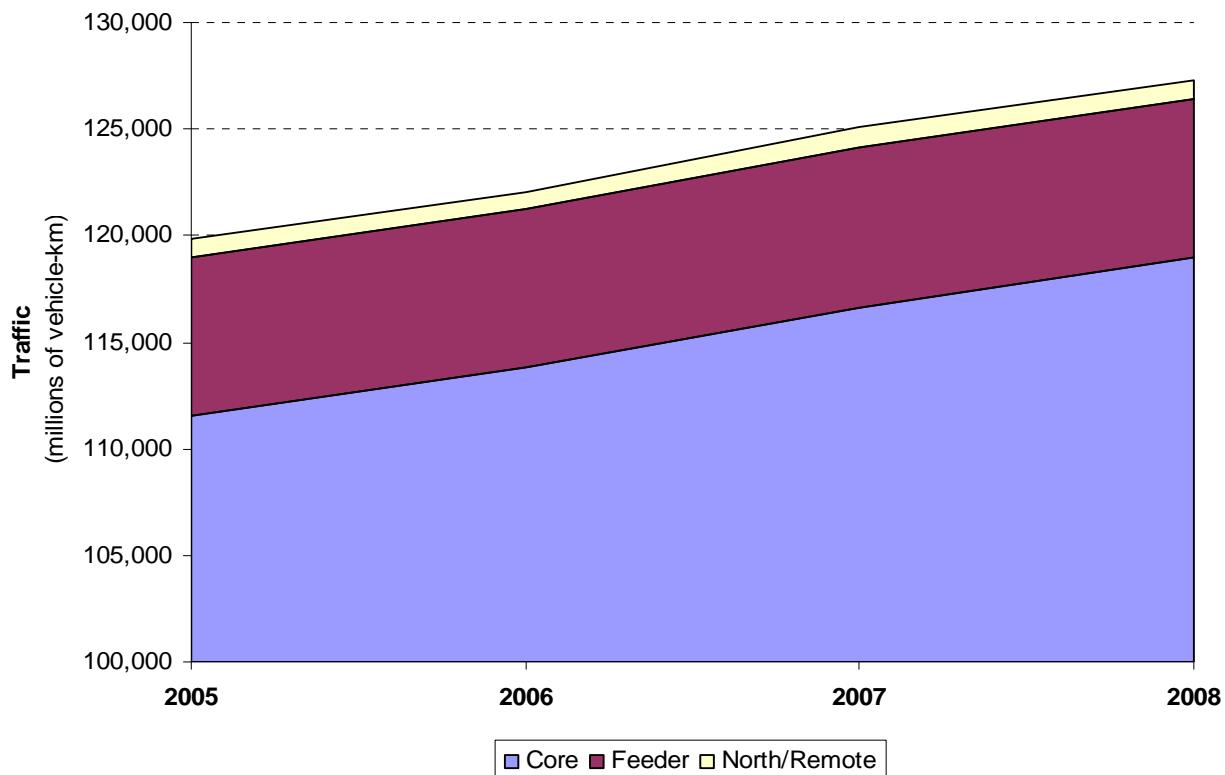

Travel (millions of Vehicle-Km)

	2005	2006	2007	2008 ¹	Change 2005-08
Core	111,551	113,829	116,593	118,947	+ 7%
Feeder	7,439	7,414	7,578	7,466	0%
Northern/Remote	828	818	913	845	+ 2%
Total	119,817	122,061	125,084	127,258	+ 6%

Truck Travel (millions of Vehicle-Km)

	2005	2006	2007	2008 ¹	Change 2005-08
Core	17,079	17,977	18,187	18,543	+ 9%
Feeder	888	913	926	933	+ 5%
Northern/Remote	101	126	138	130	+ 29%
Total	18,068	19,016	19,251	19,606	+ 9%

Travel on the National Highway System 2005-2008

Highlights:

- Travel on the National Highway System increased 6% from 2005 to 2008
 - 93% of travel on the NHS occurs on the Core Network
- Truck travel on the NHS increased 9% over the period.
 - Almost 95% of truck travel occurs on the Core Network

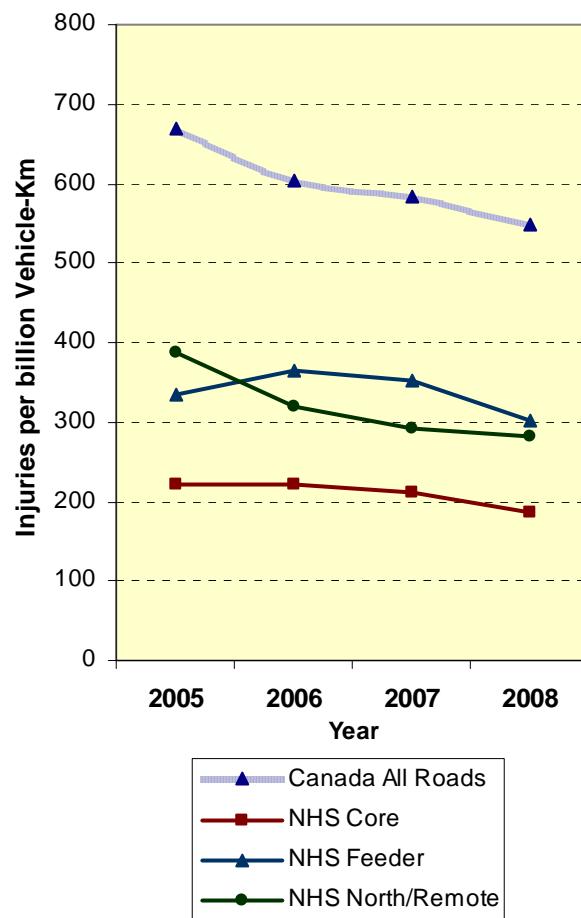

¹ Traffic data for Nova Scotia is from 2007

c) Safety

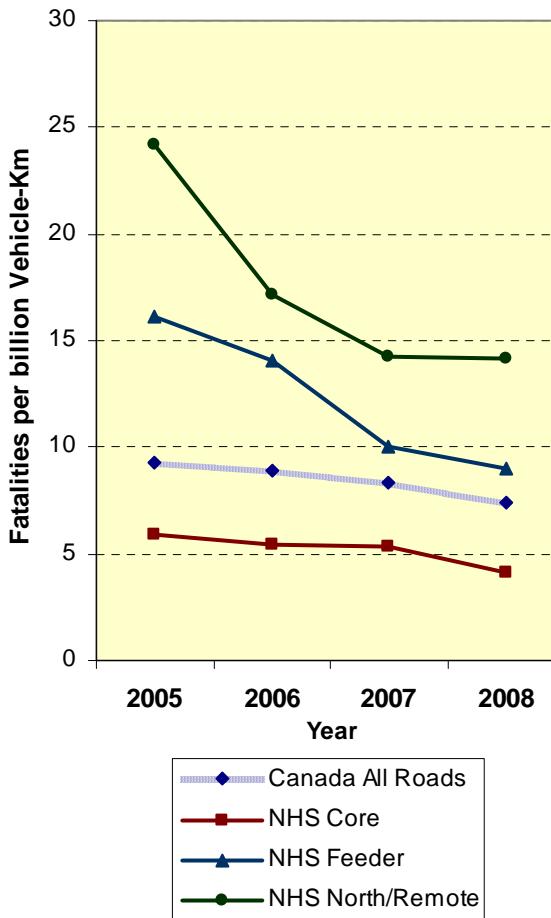

Collisions, Injuries and Fatalities on the National Highway System

	2005	2006	2007	2008 ²	Change 2005-08
Collisions	80,728	83,225	84,503	79,655	-1.3%
Injuries	27,539	28,185	27,585	24,649	-10.5%
Fatalities	796	732	712	566	-28.9%

Injury Rates

Fatality Rates

Highlights:

- While the number of collisions on the National Highway System remained relatively stable from 2005 to 2008:
 - the number of injuries per year decreased 10%
 - the number of fatalities per year decreased steadily over the period, dropping 29% over the period.
- Over 82% of collisions on the National Highway System in 2008 resulted in property damage only.
- The injury rate for collisions on the National Highway System is considerably lower (~ 50%) than for Canada's road network as a whole.
- The fatality rate for collisions on the Core NHS network is lower than the rate for all roads in Canada, but the fatality rate for collisions on both Feeder and Northern/Remote networks is higher.

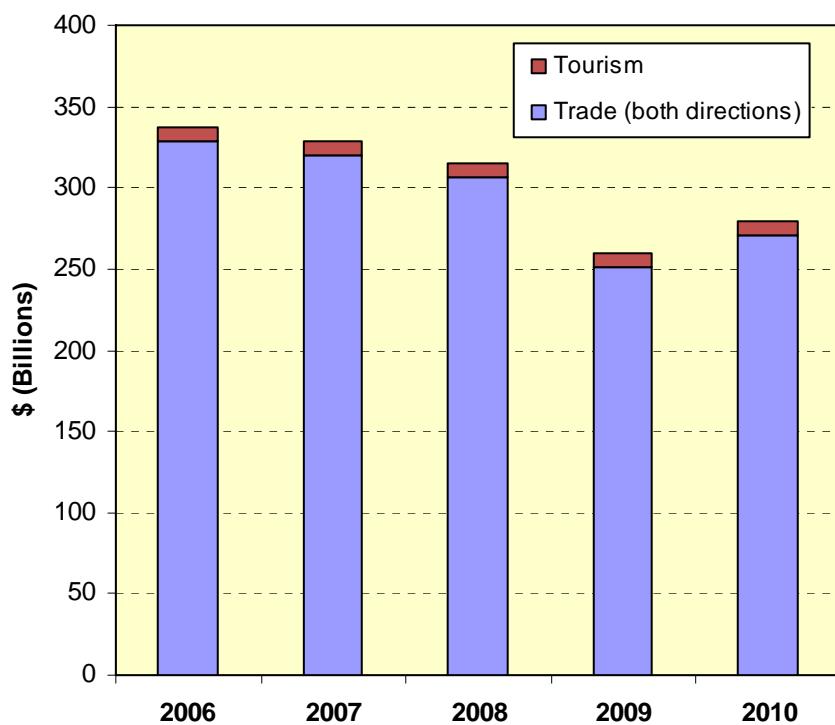

² Traffic safety data for Manitoba is from 2007

d) Border Crossings and Trade

Value of Canada/US Trade and Tourism at NHS Border Crossings (\$ billions)

	2006	2007	2008	2009	2010	Change
Trade (both directions)	328.9	319.5	306.9	251.6	271.1	- 18%
Tourism	8.5	8.7	8.6	8.1	8.7	+ 2%
Total	337.4	328.1	315.4	259.8	279.8	- 17%

Canada/US Trade and Tourism at NHS Border Crossings

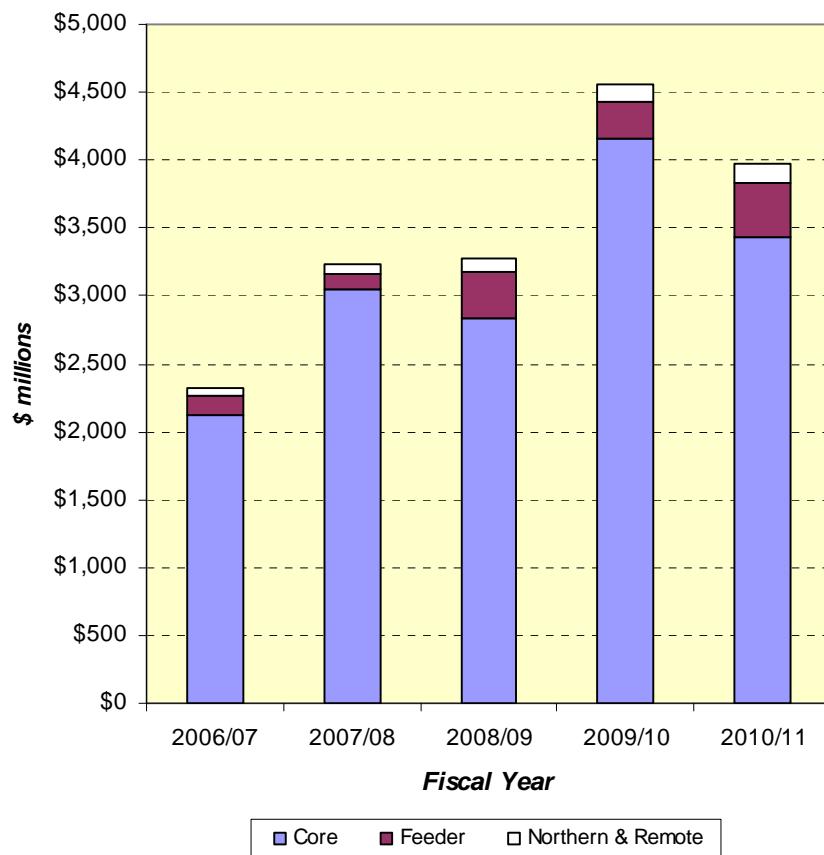

Highlights:

- Through the period 2006 to 2009 the value of trade across Canada/US border at crossings on the NHS dropped almost 24% due to the economic recession.
 - In 2010 trade rebounded almost 8% over the level reported in 2009
- The value of tourism at Canada/US border crossings on the NHS remained relatively stable through the period 2006 to 2010.

e) Investment

	Expenditures (\$ millions)				
	2006	2007	2008	2009	2010
Core	\$ 2,120.2	\$ 3,053.3	\$ 2,839.6	\$ 4,154.5	\$ 3,436.2
Feeder	\$ 144.4	\$ 102.3	\$ 333.4	\$ 272.2	\$ 393.8
Northern/Remote	\$55.9	\$ 82.7	\$ 103.6	\$ 126.0	\$ 145.9
Total	\$ 2,320.5	\$ 3,238.3	\$ 3,276.6	\$ 4,552.7	\$ 3,975.9

Investment in the National Highway System – 2006 to 2010

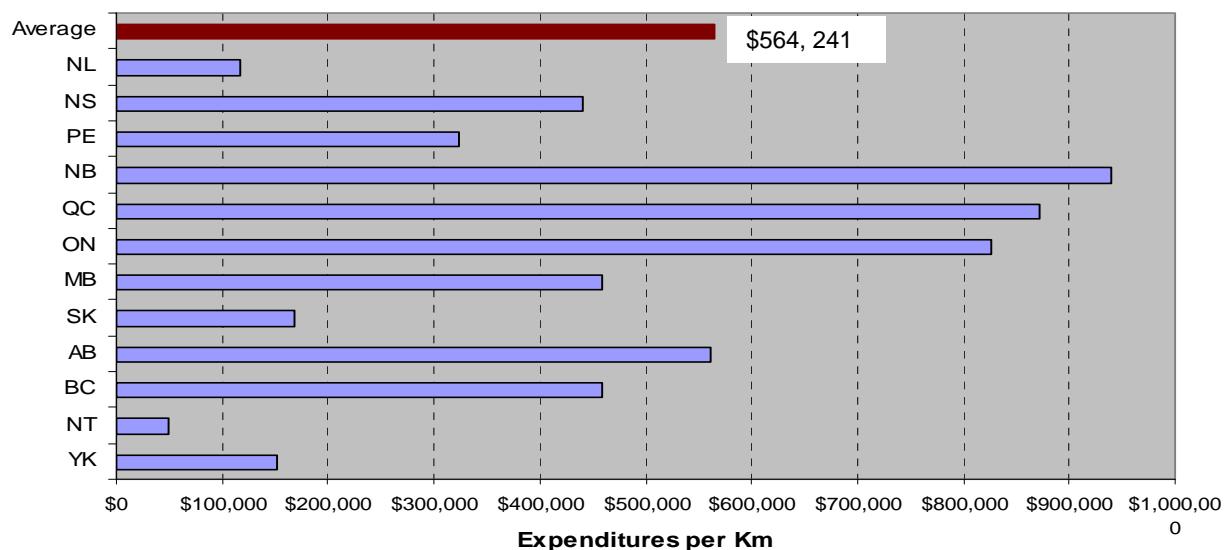

Highlights:

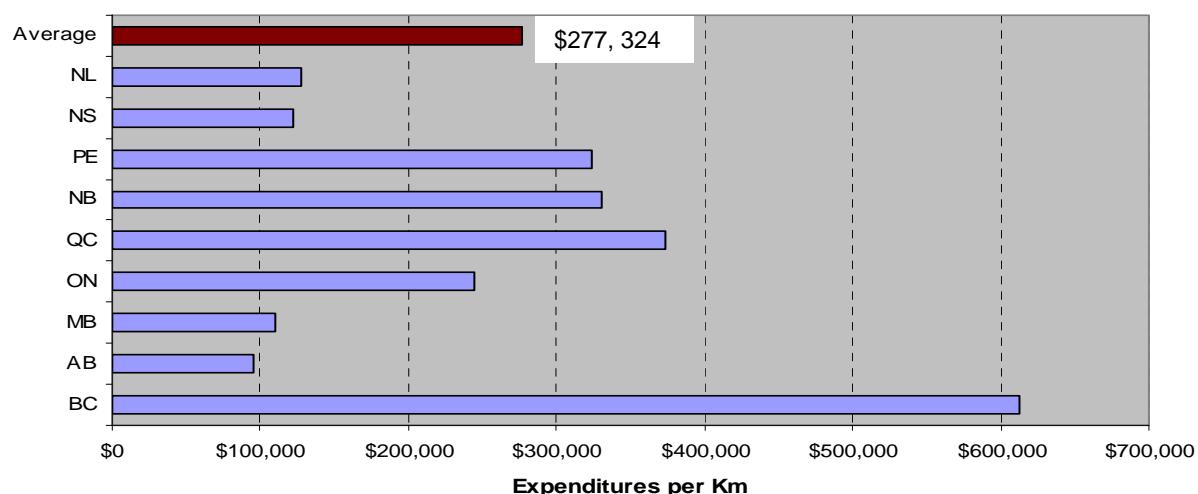

- In fiscal year 2010/11 nearly \$4 billion was invested in the National Highway System, a decrease of about 13% from the previous year.
- Since 2006/07 \$17.4 billion has been invested in the National Highway System:
 - Provincial and territorial governments ~ \$14.4 billion (83%)
 - Federal government ~ \$2.5 billion (14%)
 - Other sources ~ \$0.5 billion (3%)
- Over this period investment by NHS route category has been as follows:
 - Core Network ~ 90%
 - Feeder Network ~ 7%
 - Northern and Remote Network ~ 3%

Investment in the National Highway System – 2006 to 2010

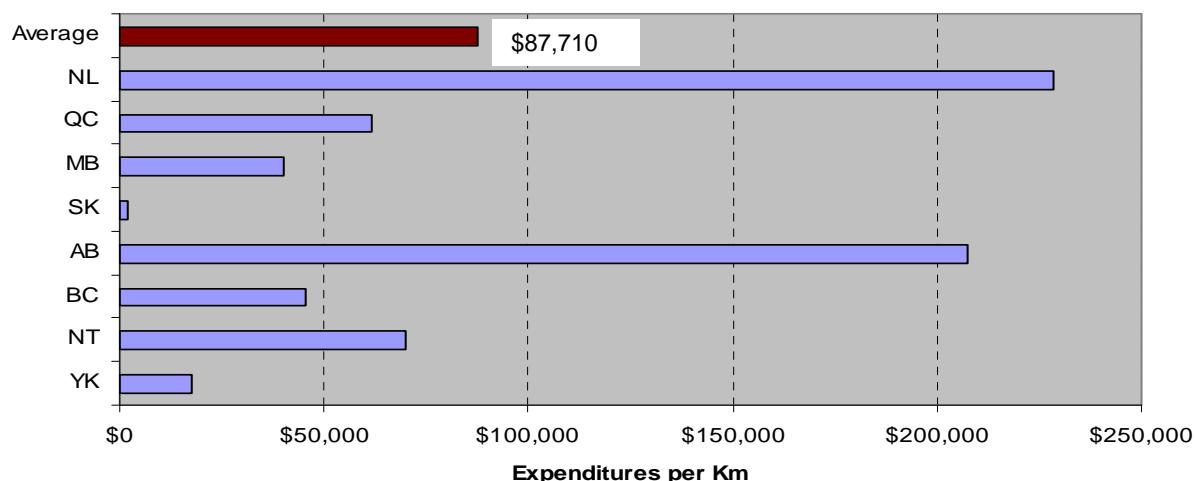

Core Route Network: Expenditures per Km

Feeder Route Network: Expenditures per Km

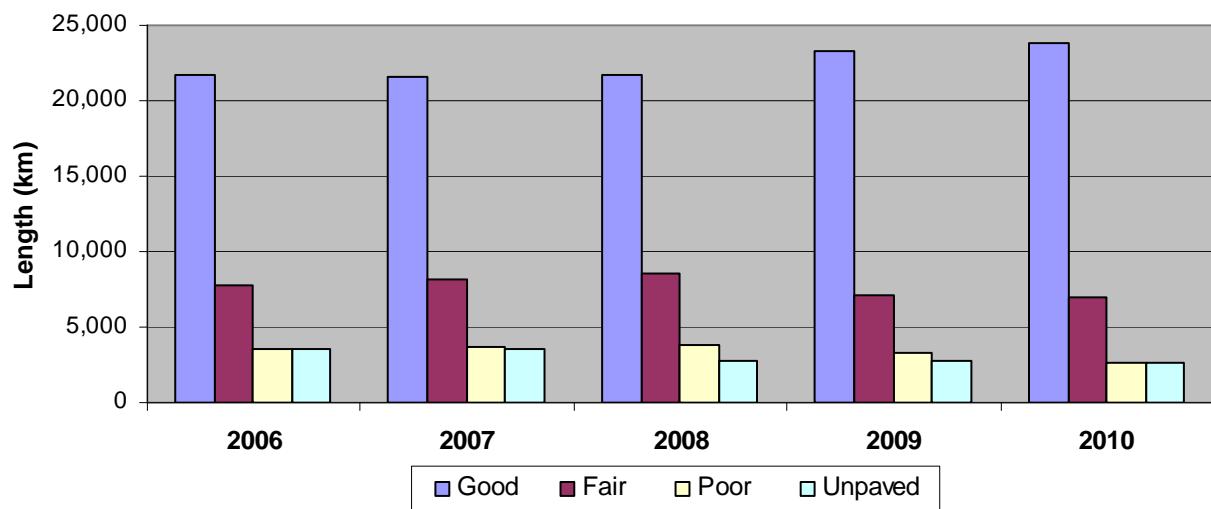

Northern and Remote Route Network: Expenditures per Km

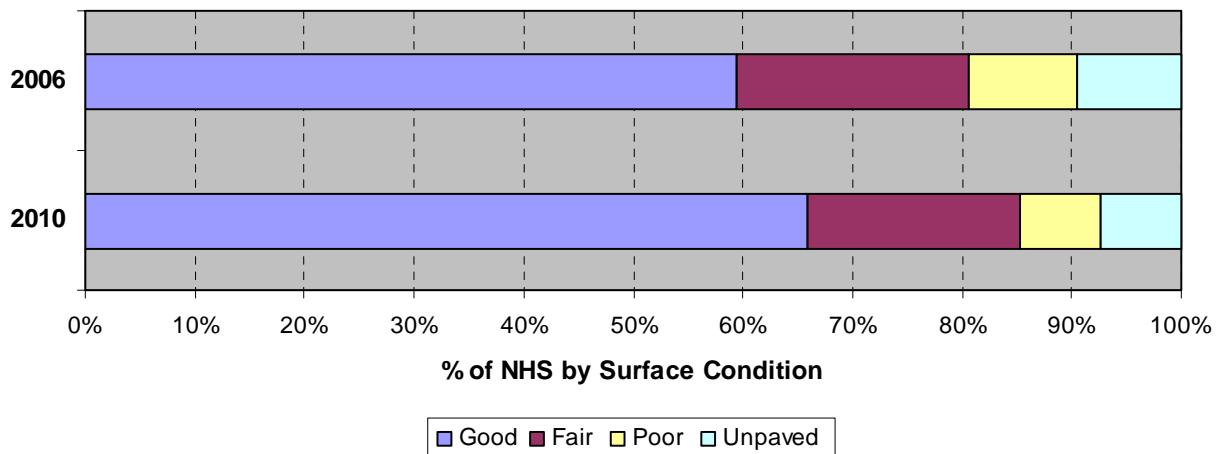

f) Pavement Condition

National Highway System: Surface Condition Changes 2006-2010³

	2006	2007	2008	2009	2010
Paved – Good	21,649	21,639	21,768	23,257	24,234
Paved - Fair	7,781	8,167	8,604	7,169	7,174
Paved – Poor	3,537	3,671	3,799	3,245	2,743
Unpaved	3,501	3,489	2,792	2,720	2,667

National Highway System: Surface Condition Changes 2006 vs 2010*

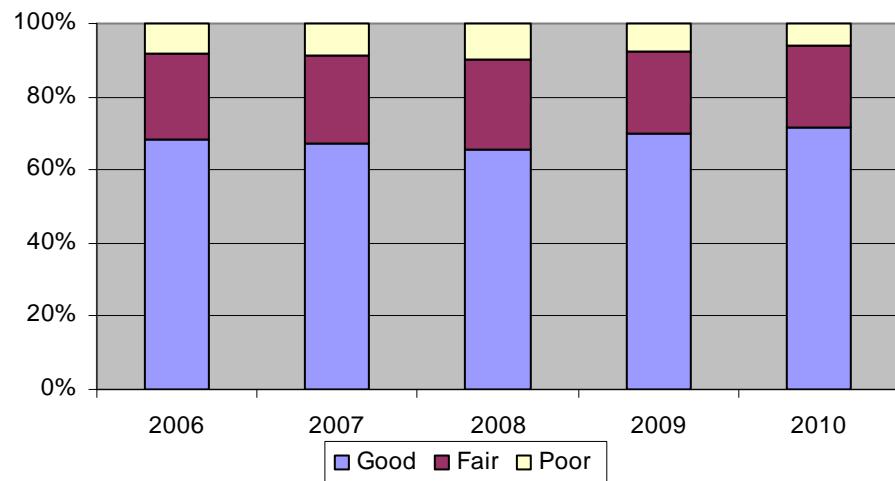

Highlights:

- Since 2006 the length of the NHS with pavement condition rated as “good” has increased 12% (~ 2,600 km).
- The length with pavement condition rated as “poor” has decreased 22% (~ 800 km).
- The length of unpaved NHS has decreased by 24% (~ 800 km)

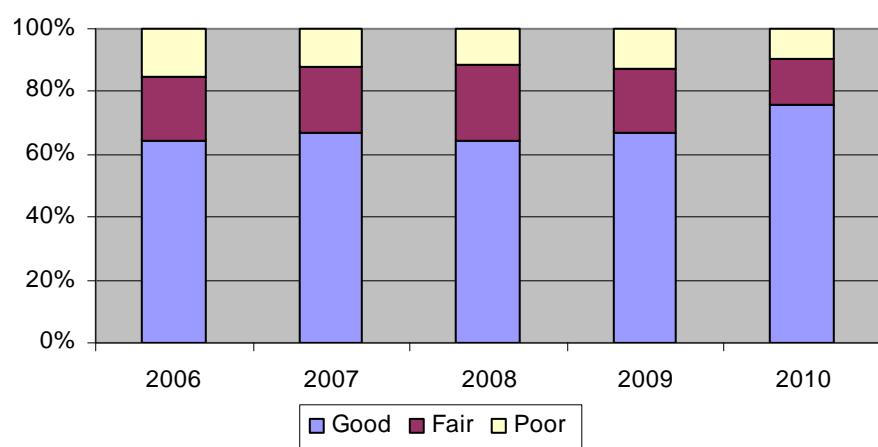

³ Pavement condition rating information provided by jurisdictions is not based on identical criteria and thresholds; with some variations in the factors considered and approaches used to classify pavements as good, fair or poor.

NHS Surface Condition 2006-2010

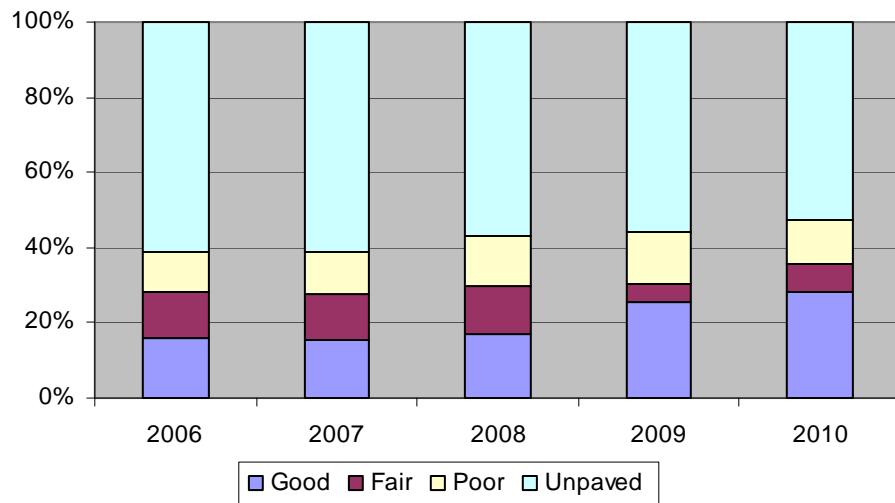

Core Network

Feeder Network

Northern Remote Network

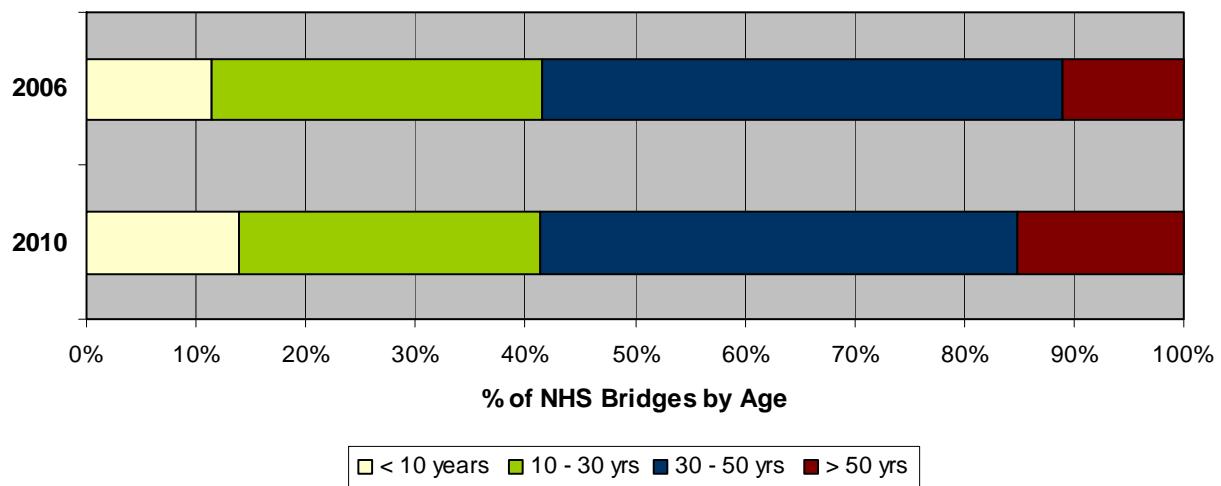

g) Bridges and Structures

Number of Bridges and Structures on the NHS⁴

	2006	2007	2008	2009	2010
Core	6,676	6,825	7,291	7,401	7,553
Feeder	813	808	856	876	882
Northern/Remote	299	298	308	308	314
Total	7,788	7,931	8,455	8,585	8,749

**NHS Bridges and Structures:
Inventory Age Profile 2006 vs. 2010**

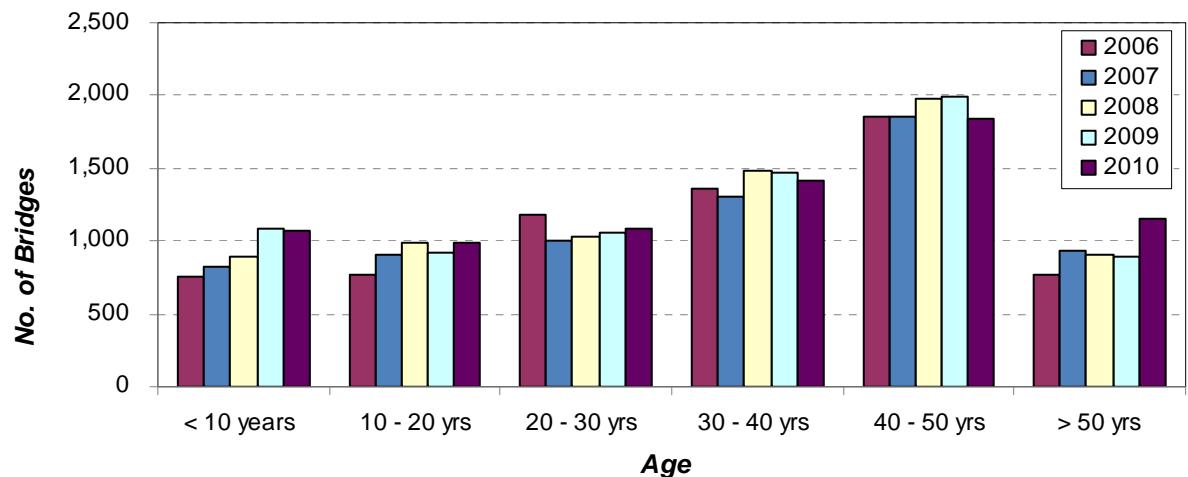

Highlights:

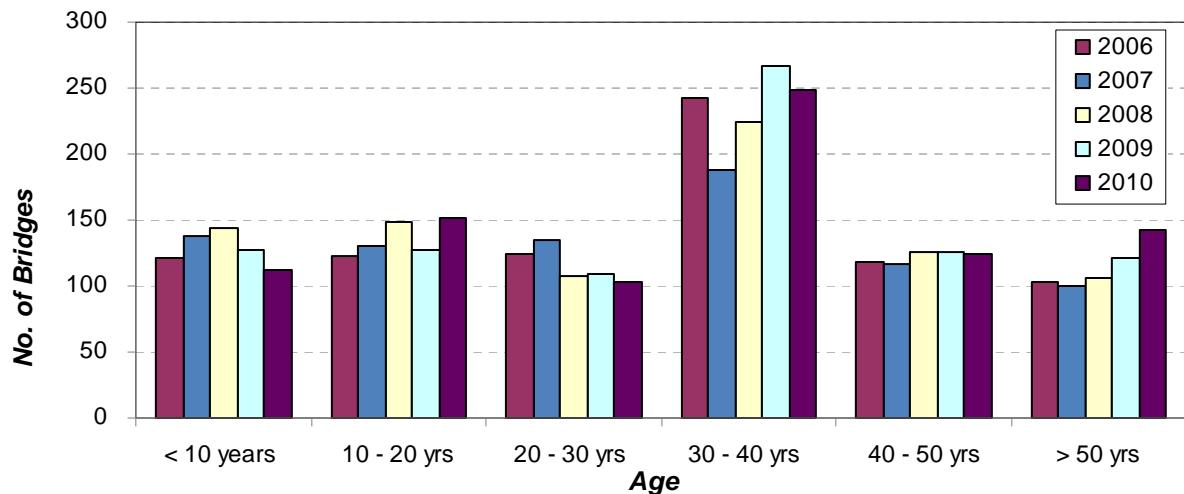

- The number of bridges on the NHS that are less than 10 years old increased 16% from 2006 (896) to 2010 (1,223) as a reflection of increased investment and new construction.
- The number of bridges on the NHS which are over 50 years old increased over 50% from 2006 (870) to 2010 (1,318).

⁴ Includes all bridges and structures with a span greater than 3.0 m (including large culverts)

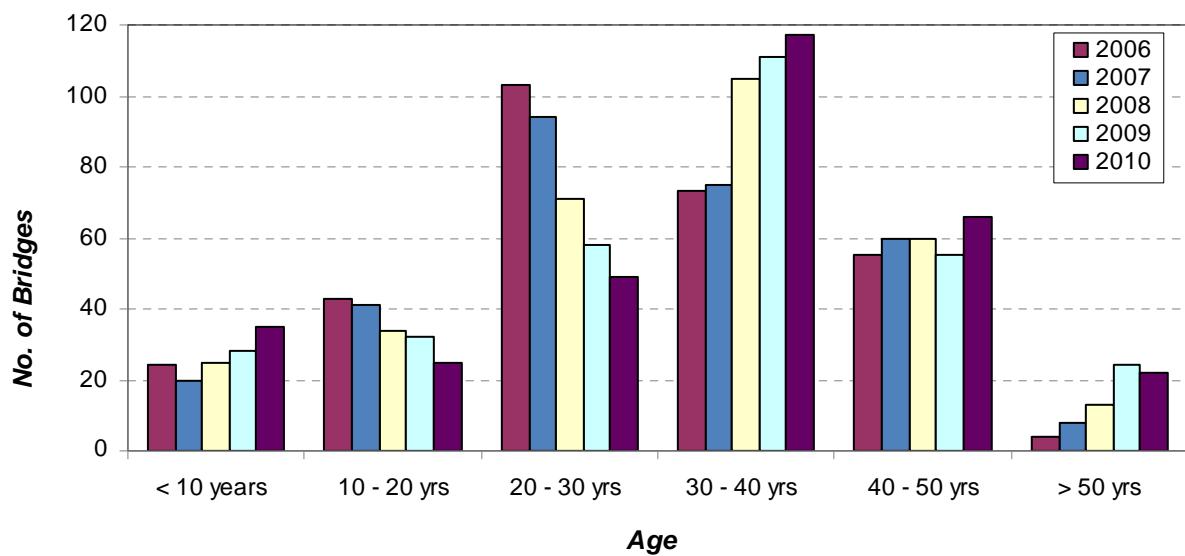

NHS Core Routes: Bridge Age Profile

NHS Feeder Routes: Bridge Age Profile

NHS Northern and Remote Routes: Bridge Age Profile

Part 2: National Highway System – 2010 Data by Jurisdiction

National Highway System Length (December 2010)

Jurisdiction	Core Network (km)	Feeder Network (km)	Northern & Remote Network (km)	Total – National Highway System (km)
Yukon	1068.4	-	947.9	2016.3
Northwest Territories	575.6	-	847.2	1422.8
Nunavut	-	-	-	-
British Columbia	5855.3	446.7	724.0	7026.0
Alberta	4036.2	215.5	196.5	4448.3
Saskatchewan	2438.4		238.0	2676.5
Manitoba	982.3	741.9	368.2	2092.4
Ontario	6130.7	705.6		6836.3
Québec	3455.6	768.1	1435.3	5658.9
New Brunswick	994.7	833.8		1828.5
Prince Edward Island	208.2	188.0		396.2
Nova Scotia	903.0	295.5		1198.5
Newfoundland and Labrador	1007.6	298.0	1163.0	2468.6
Total NHS Length (km)	27656.0	4493.1	5920.1	38069.2

The length information is based on the centerline distance of a roadway between start and end points (rather than lane-kilometers or “two-lane equivalent” lengths).

Travel and Traffic (2008)

National Highway System – Surface Condition 2010

⁷ Pavement condition rating information provided by jurisdictions is not based on identical criteria and thresholds;

- Transports Québec does not normally use the categories of "Good", "Fair" and "Poor". The thresholds used to differentiate "Good" from "Fair" are not used in Quebec, and the thresholds to differentiate "Fair" from "Poor" are based on thresholds for intervention, which vary from one class of road to another.

- Saskatchewan and Manitoba use only two pavement condition rating categories; "Good" and "Poor".

⁸ In some cases the cell totals for "good, fair, poor and unpaved" do not add up to the total length of NHS in each jurisdiction, primarily because pavement rating data was not available for some sections

⁹ Pavement condition information for PEI is from 2006

	27656.0	4493.1	5920.1	38069.2	+ 58.9

Route Description and Segment Length Changes: December 31, 2009 to December 31, 2010

Adjustments to system description and route inventory:

Yukon
Changes in section lengths due to re-measurement (increase of 7.9 km)
Northwest Territories - No changes
British Columbia – No changes
Alberta
Adjustment in length of Core Routes due to opening of sections of Calgary ring road (Hwy 201 - increase of 42.5 km)
Saskatchewan
Adjustment in section lengths on Hwy 16 and Hwy 11 (increase of 5.9 km)
Manitoba - No changes
Ontario - No changes
Quebec
Minor changes in section lengths due to re-measurement (increase of 2.8 km)
New Brunswick - No changes
Prince Edward Island - No changes
Nova Scotia - No changes
Newfoundland and Labrador - No changes
Federal Roads - No changes
