

Council of Ministers Responsible for Transportation and Highway Safety

Canada's National Highway System

Annual Report 2016

September 2017

Introduction

Canada's National Highway System is an evolution of the Trans-Canada Highway concept originally launched in 1949. Construction of the Trans-Canada Highway began in 1950 under the authority of the *Trans-Canada Highway Act*. In 1962 Prime Minister John Diefenbaker officially opened the Trans-Canada Highway, although construction continued until 1971. A key goal of the Trans-Canada Highway was to connect all the provinces together by highway, which was pursued through a cost-sharing partnership between federal and provincial governments to upgrade existing roadways to "Trans-Canada" standards. The Trans-Canada highway encompassed 7,821 km of highways spanning the width of the country from Victoria to St. John's.

The National Highway System (NHS) was established in 1988 by the Council of Ministers Responsible for Transportation and Highway Safety. The 24,500 kilometre network of key interprovincial and international highway linkages was identified through a federal-provincial-territorial cooperative study carried out over the period 1988 to 1992.

In September 2004 the Council of Ministers approved the addition of 2,700 kilometres of new routes to the NHS, as a result of a study undertaken by Transport Canada. In September 2005, following a comprehensive review of the NHS by a federal, provincial and territorial Task Force, further expansion of the system to include an additional 11,000 kilometres of routes was endorsed by the Council of Ministers.

In 2016 the National Highway System encompassed 38,049 kilometres of key highway linkages that are vital to both the economy and to the mobility of Canadians. Over 95 percent of the NHS is owned and operated by provincial and territorial governments. NHS roads under federal control (mostly roads through national parks and the Alaska Highway) account for about 3 percent of the NHS network and roads under municipal control account for about 2 percent. The federal government is also responsible for two major bridges in Montreal (Champlain and Jacques Cartier), and portions of the Bonaventure Expressway and the Honoré-Mercier Bridge.

The NHS comprises three categories of routes, each of which are defined by specific criteria that can be used to assess route eligibility:

Core Routes

- Key interprovincial and international corridor routes (including links to intermodal facilities and important border crossings)

Feeder Routes

- Key linkages to the Core Routes from population and economic centres (including links to intermodal facilities and important border crossings)

Northern and Remote Routes

- Key linkages to Core and Feeder routes that provide the primary means of access to northern and remote areas, economic activities and resources.

The information contained in the report that follows offers insight to the role played by the National Highway System, its performance, the state of its infrastructure and the investment being made in its restoration and improvement.

The report was assembled using statistical information provided by the federal, provincial and territorial departments of transportation, and while effort was taken to ensure completeness and consistency, it should be noted that data for municipal roads on the NHS was not readily available, and except where explicitly noted, is not included in the summaries.

The content of this report is structured as follows:

- **Part 1** provides an overview of the trends and changes which have occurred with the performance and condition of the National Highway System since 2005
- **Part 2** presents in greater detail the most recent information collected from jurisdictions on the performance and condition of the National Highway System (generally for 2015 and 2016).
- **Appendix 1** provides a detailed breakdown of the routes contained in the National Highway System as of December 31, 2016

Additional information on the National Highway System, including past reports and studies, can be found on the Internet at www.comt.ca.

e) Investment.....	11
f) Pavement Condition.....	13
g) Bridges and Structures	15
Part 2: National Highway System – Data by Jurisdiction	17
Appendix 1 - National Highway System Route Inventory.....	24

Highlights –Summary

System Length

- The length of the National Highway System was 38,049 km as of December 2016, essentially unchanged since 2005.
 - the NHS constitutes about 3.7% of the length of the public road network in Canada

Traffic

- In 2015 the NHS carried over 134 billion vehicle-kilometers of travel, and 19 billion vehicle-kilometers of truck travel.
- Travel on the National Highway System increased 12% from 2005 to 2015.
- Truck travel on the NHS increased 8% from 2005 to 2015.
 - Truck travel on the Northern/Remote Network increased 72% from 2005 to 2015.

Safety

- There were 83,000 collisions on the National Highway System in 2015, resulting in 495 fatalities and over 23,000 injuries
- While the number of collisions on the National Highway System increased 3% from 2005 to 2015:
 - the number of fatalities per year decreased 38% over the period and the number of injuries per year decreased 15%.

Canada-US Trade and Tourism at NHS Border Crossings

- Since 2006 over \$3.5 trillion in Canada/US trade has passed through border crossings on the NHS
- The value of tourism at Canada/US border crossings on the NHS is about \$12 billion per year, but has fallen 11% since 2013

Investment

- Since 2006/07 over \$39 billion has been invested in the National Highway System:
 - Provincial and territorial governments ~ \$33.7 billion (86%)
 - Federal government ~ \$4.9 billion (12%)
 - Other sources ~ \$0.7 billion (2%)
- In fiscal year 2016/17 nearly \$3.9 billion was invested in the National Highway System, unchanged from the previous year.

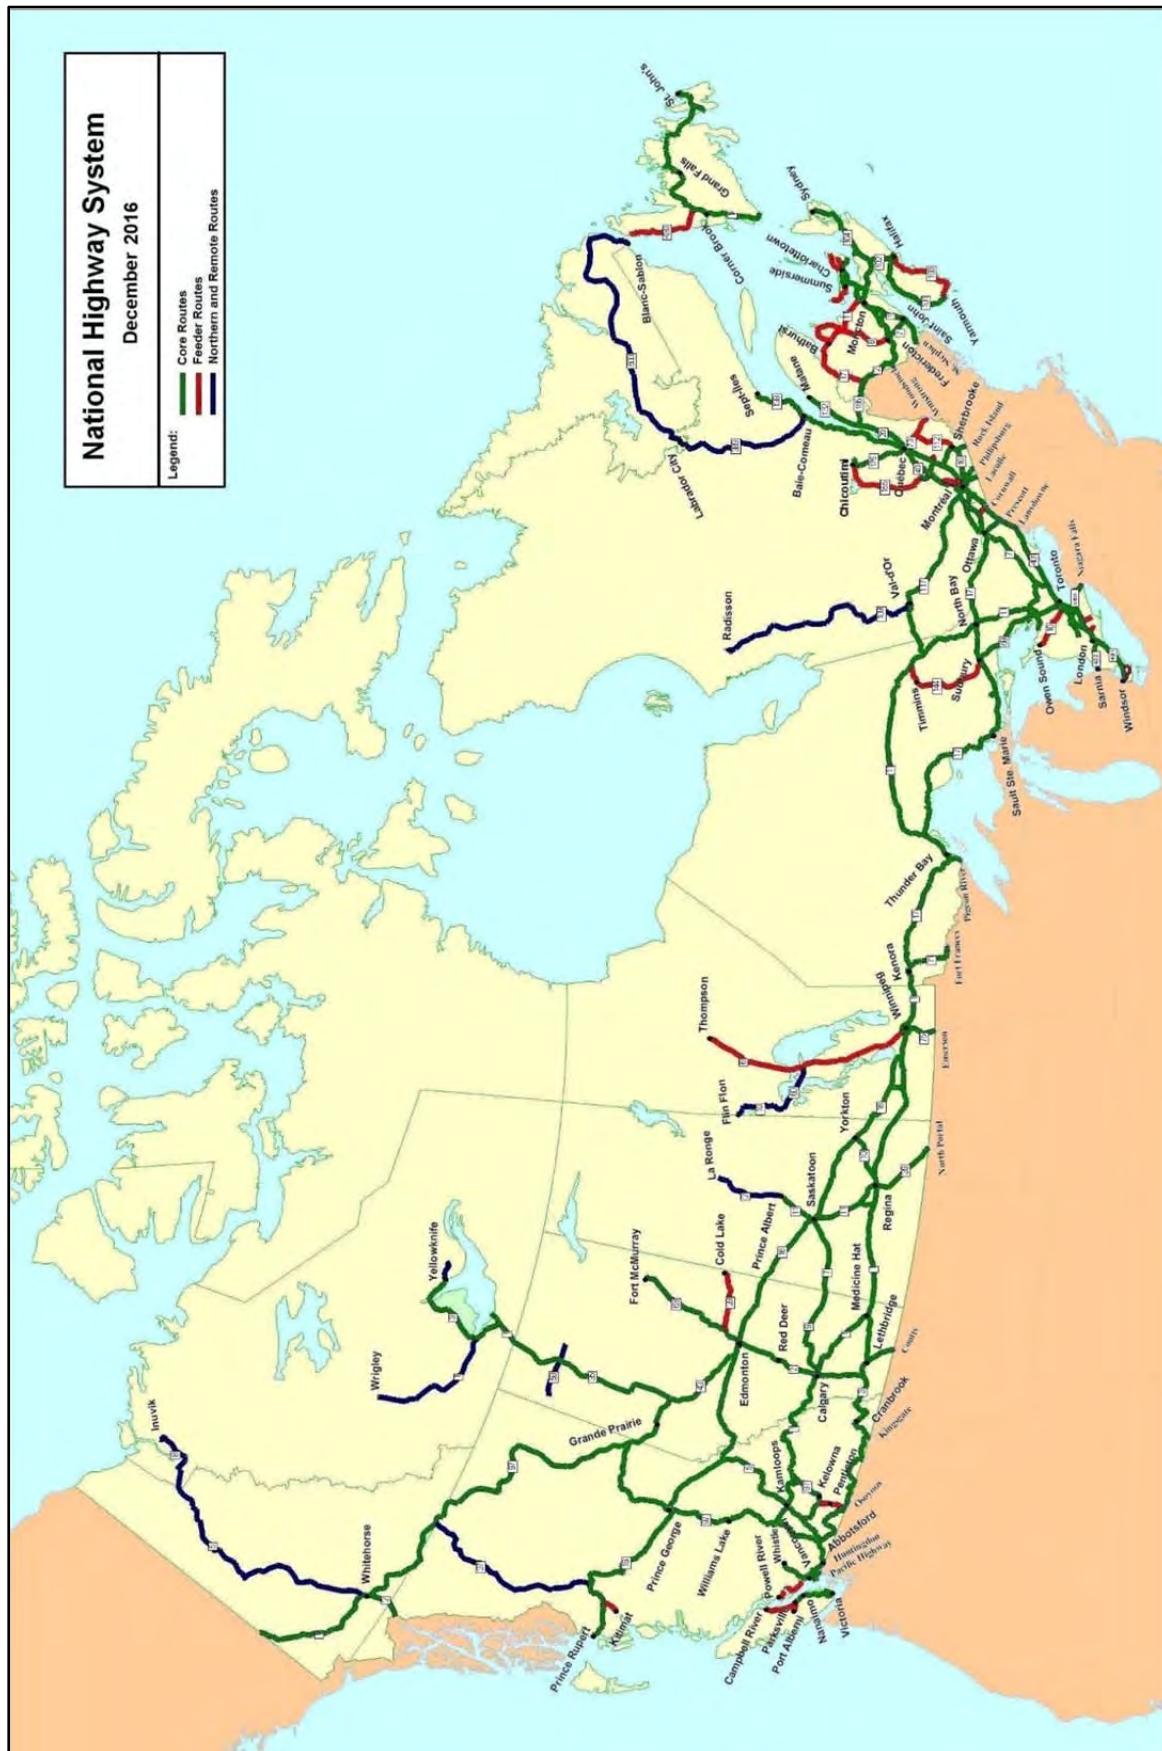

Pavement and Road Surface Condition

- Since 2012, the condition of pavement surfaces on the NHS has remained relatively unchanged with 71% of the network in “good” condition and 23% in “fair” or “poor” condition.
- About 6% of the NHS remained unpaved in 2016.

Bridges and Structures

- In 2016 there were over 10,600 bridges and structures on the NHS
- The number of bridges which are less than 10 years increased from 896 in 2006 to 2,326 in 2016.
- Since 2006 nearly 1,200 bridges on the NHS are new or have undergone major rehabilitation.
- The number of bridges which are over 50 years has also doubled over the period from (870 in 2006 to 2,117 in 2016.

System Map

Part 1: Developments and Highlights

a) System Length and Route Inventory

Network Length (km)

	2005	2016	Change
Core	27,608	27,722	+ 114 km
Feeder	4,490	4,411	- 79 km
Northern/Remote	5,922	5,916	- 6 km
Total	38,021	38,049	+ 28 km

Highlights:

- The length of the National Highway System has not changed significantly since a major review and expansion was approved by the Council of Ministers in 2005.
- Adjustments have been made annually in the length of the network due to:
 - Changes in route alignments resulting from construction
 - Changes in route segments included in the NHS when bypasses are completed
 - Corrections to route segment lengths resulting from new measurements.

b) Traffic and Travel

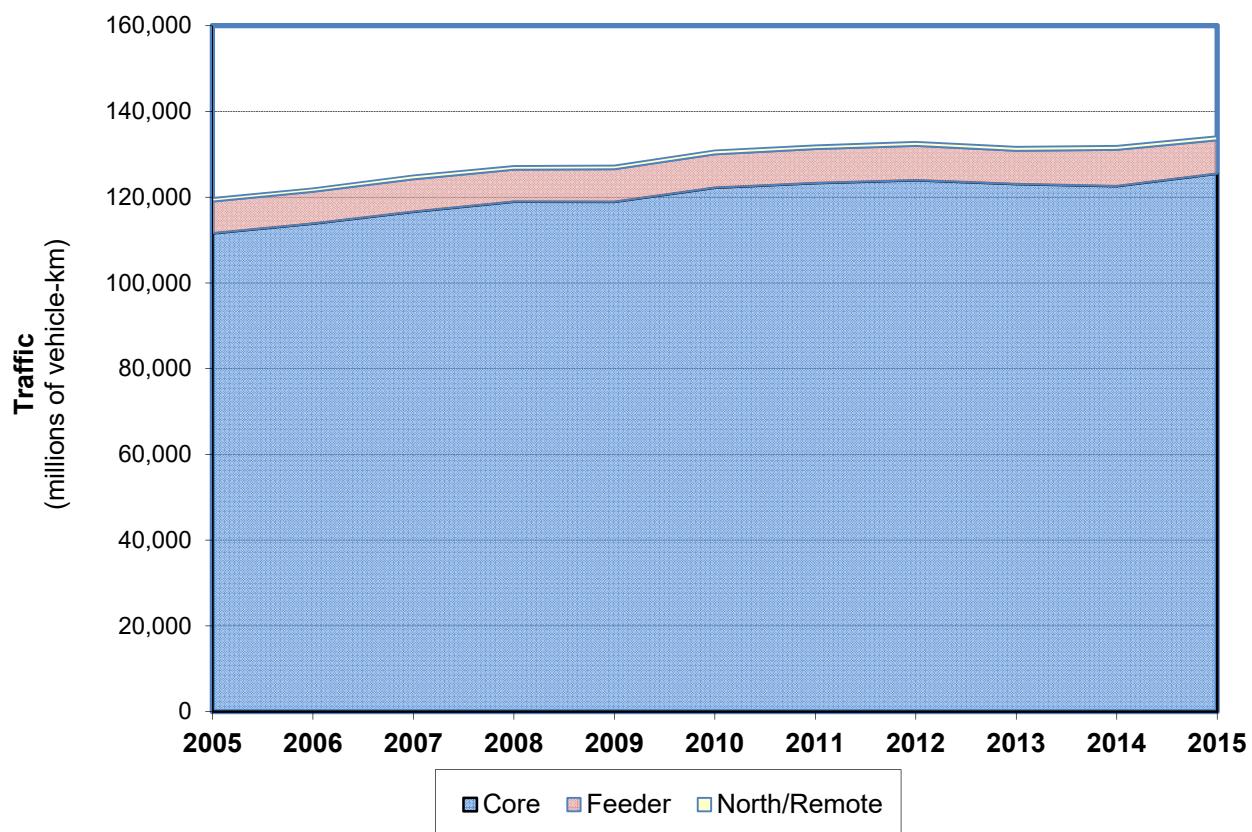

Travel (millions of Vehicle-Km)

	2005	2015 ¹	Change
Core	111,551	125,486	+ 12%
Feeder	7,439	7,781	+ 5%
Northern/Remote	828	932	+ 13%
Total	119,817	134,199	+ 12%

Truck Travel (millions of Vehicle-Km)

	2005	2015 ¹	Change
Core	17,079	18,427	+ 8%
Feeder	888	899	+ 1%
Northern/Remote	101	174	+ 72%
Total	18,068	19,500	+ 8%

Travel on the National Highway System 2005-2015

Highlights:

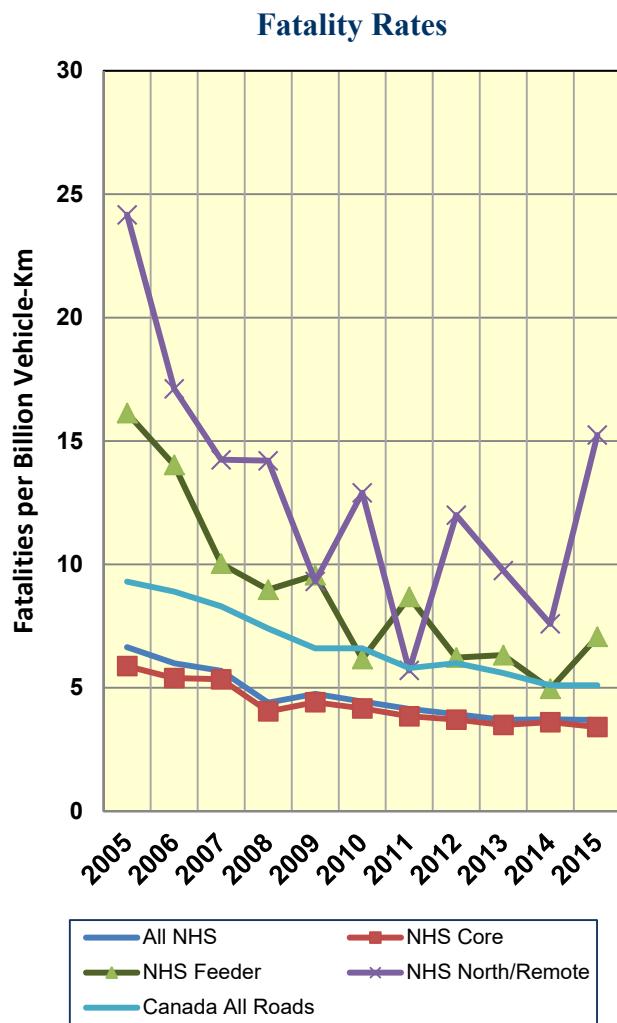

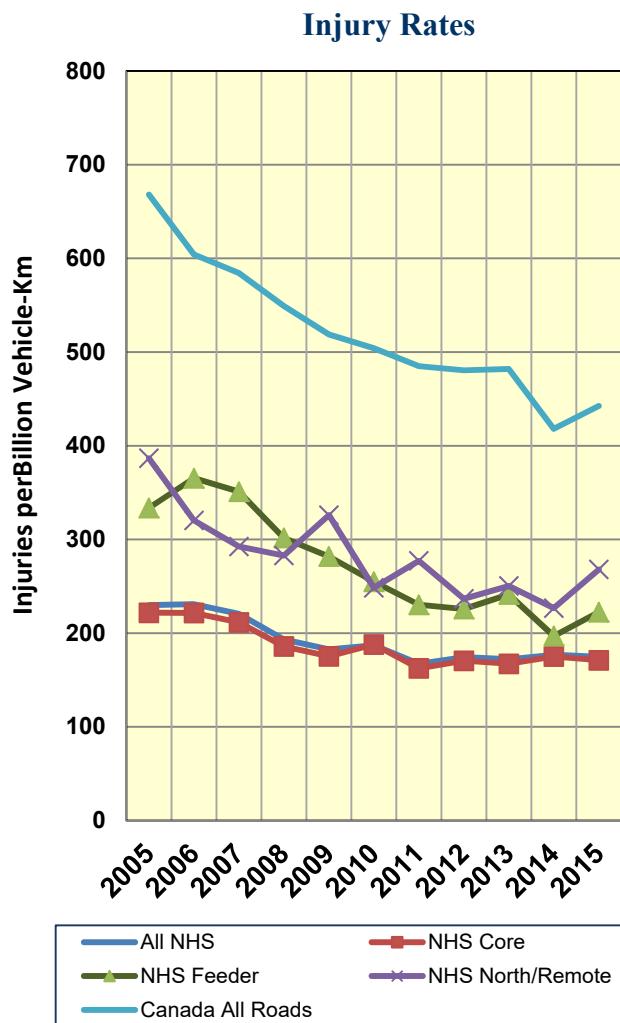

- Travel on the National Highway System increased 12% from 2005 to 2015
- Truck travel on the NHS increased 8% over the period.
 - Truck travel on the Northern/Remote network has increased 72% since 2005

¹ Includes traffic data for Yukon from 2012

c) Safety

Collisions, Injuries and Fatalities on the National Highway System

	2005	2015 ²	Change
Collisions	80,728	82,974	+ 3%
Injuries	27,539	23,330	- 15%
Fatalities	796	495	- 39%

Highlights:

- While the number of collisions on the National Highway System increased 3% from 2005 to 2015:
 - the number of injuries per year decreased 15%
 - the number of fatalities per year dropped 39% over the period.

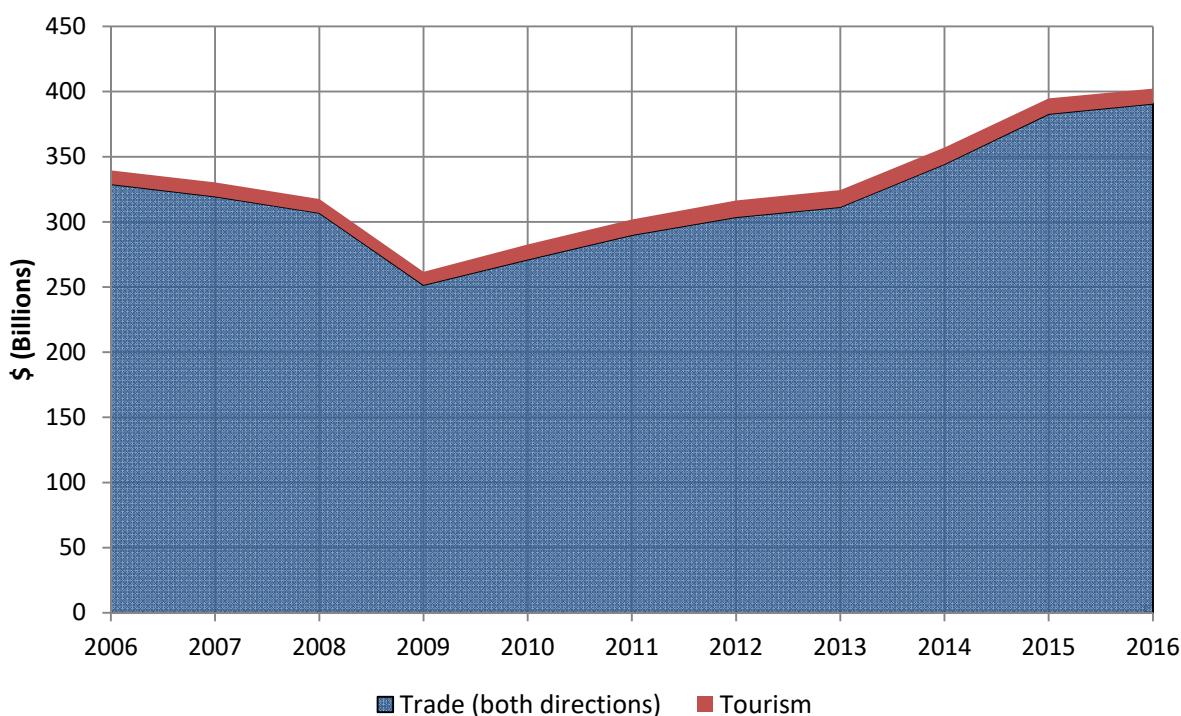

² Data for Manitoba is from 2014, Alberta is from 2012, New Brunswick from 2011

d) Border Crossings and Trade

**Value of Canada/US Trade and Tourism at
NHS Border Crossings (\$ billions)**

	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Trade³	328.9	319.5	306.9	251.6	271.1	289.9	303.7	311.4	344.3	382.8	390.7
Tourism	10.6	10.8	10.6	10.1	11.5	11.9	12.7	13.0	12.7	11.9	11.5
Total	339.5	330.3	317.5	261.7	282.6	301.8	316.4	324.4	357.0	394.7	402.2

**Canada/US Trade and Tourism at
NHS Border Crossings**

Highlights:

- Two-way trade (\$ value) passing through NHS border crossings has risen six consecutive years since the 2008-2009 recession ended. At the end of 2016, two-way trade was 19% higher than the recent peak level reported in 2006 and 55% higher than the nadir of 2009.
- In 2016, Ambassador Bridge accounted for over 32% of the two-way trade value among NHS border crossings, more than twice as much as the 2nd ranked crossing (Sarnia - Blue Water Bridge). Ambassador's two-way trade has grown 68% since 2009 and has eclipsed its 2006 level by 11%.
- The value of tourism for vehicles using NHS border crossings has fallen over 11% since 2013.

³ Both directions

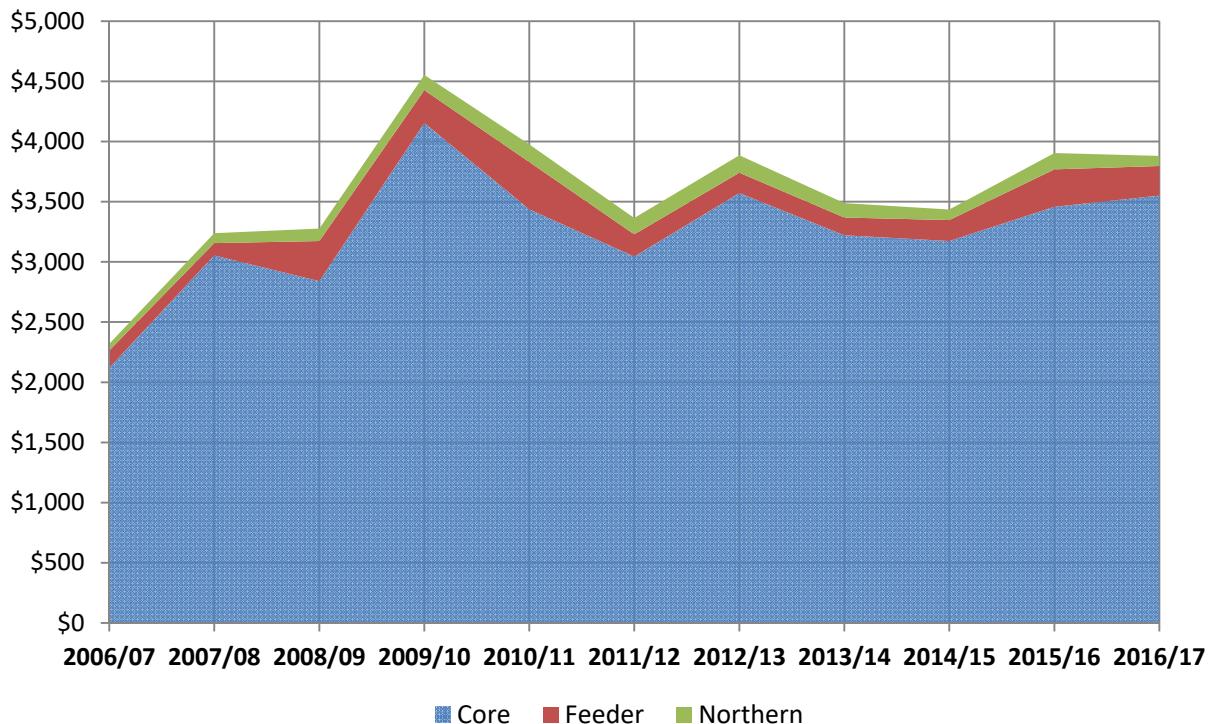

e) Investment

Expenditures (\$ millions)

	2006	2007	2008	2009	2010	2011
Core	\$ 2,120	\$ 3,053	\$ 2,840	\$ 4,155	\$ 3,436	\$ 3,045
Feeder	\$ 144	\$ 102	\$ 333	\$ 272	\$ 394	\$ 184
Northern/Remote	\$ 56	\$ 83	\$ 104	\$ 126	\$ 146	\$ 135
Total	\$ 2,320	\$ 3,238	\$ 3,277	\$ 4,553	\$ 3,976	\$ 3,364

	2012	2013	2014	2015	2016	Total (2006-16)
Core	\$ 3,572	\$ 3,222	\$ 3,173	\$ 3,457	\$ 3,551	\$ 35,624
Feeder	\$ 169	\$ 148	\$ 175	\$ 312	\$ 245	\$ 2,479
Northern/Remote	\$ 144	\$ 119	\$ 88	\$ 136	\$ 84	\$ 1,219
Total	\$ 3,885	\$ 3,488	\$ 3,436	\$ 3,905	\$ 3,880	\$ 39,322

Investment in the National Highway System – 2006 to 2016
(millions)

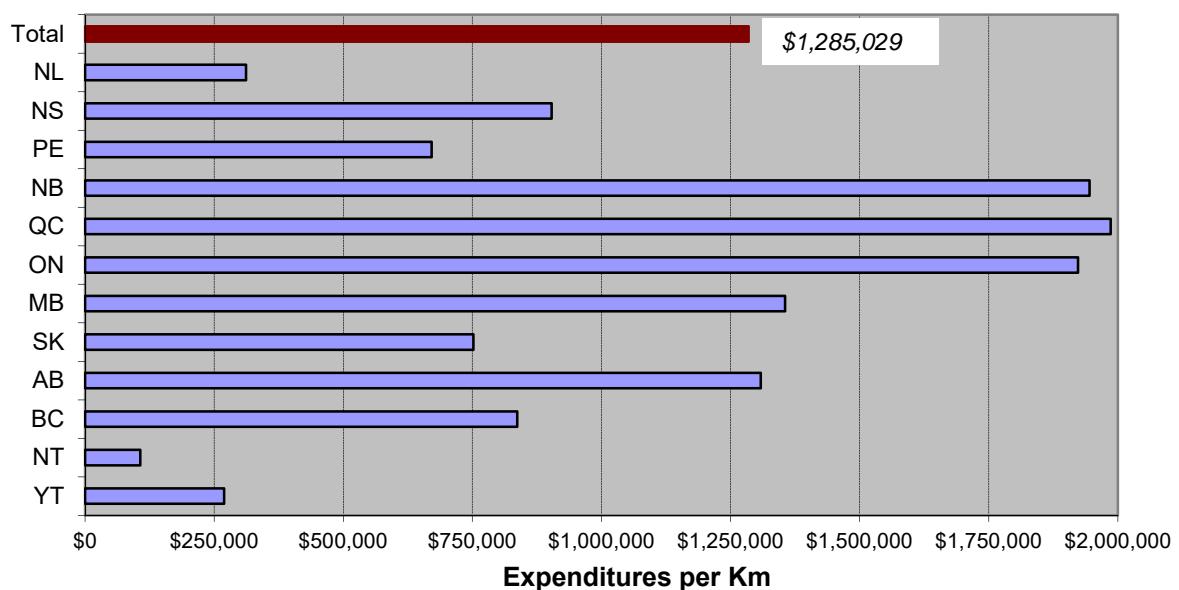

Highlights:

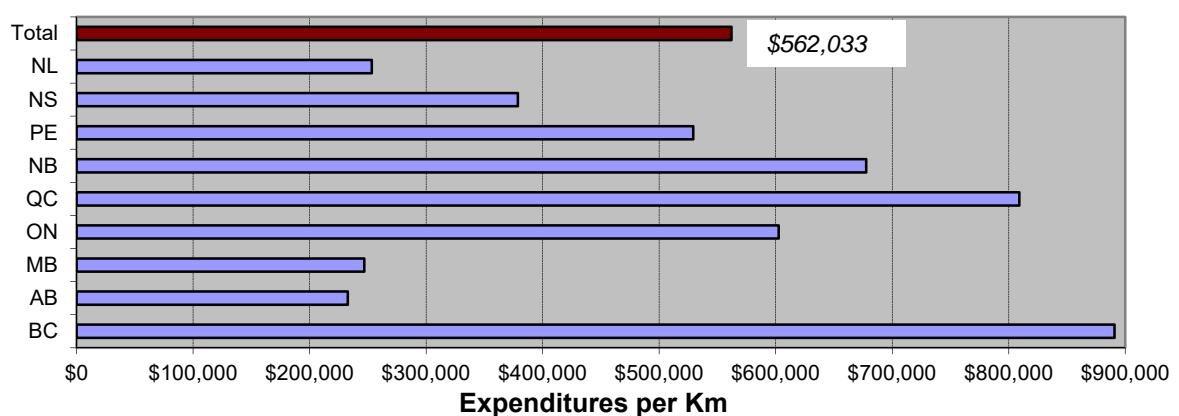

- In fiscal year 2016/17 nearly \$3.9 billion was spent on capital improvements to the National Highway System.
- Since 2006/07 over \$39 billion has been invested in the National Highway System:
 - Provincial and territorial governments ~ \$33.7 billion (86%)
 - Federal government ~ \$4.9 billion (12%)
 - Other sources ~ \$0.7 billion (2%)
- Over this period investment by NHS route category has been as follows:
 - Core Network ~ 91%
 - Feeder Network ~ 6%
 - Northern and Remote Network ~ 3%

Investment in the National Highway System – 2006 to 2016

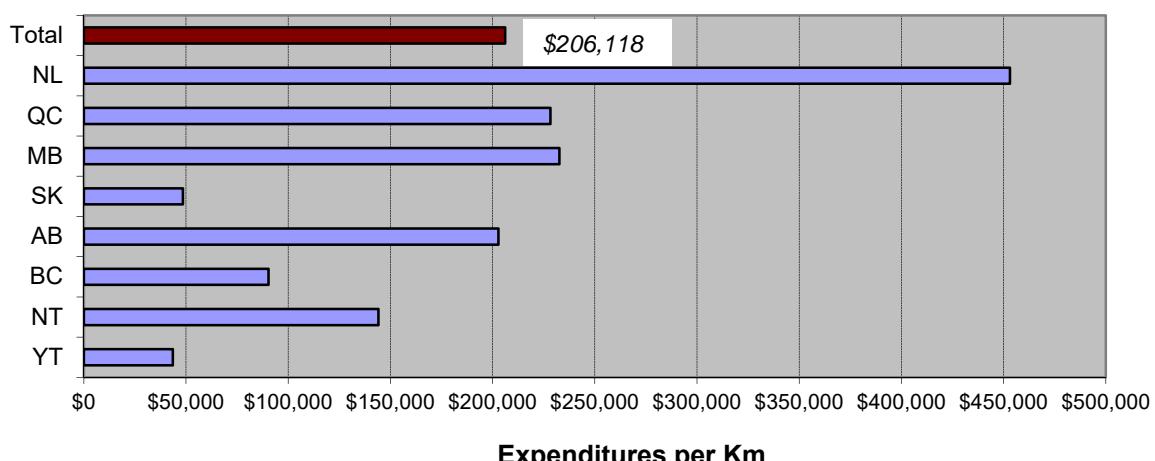

Core Route Network: Expenditures per Km

Feeder Route Network: Expenditures per Km

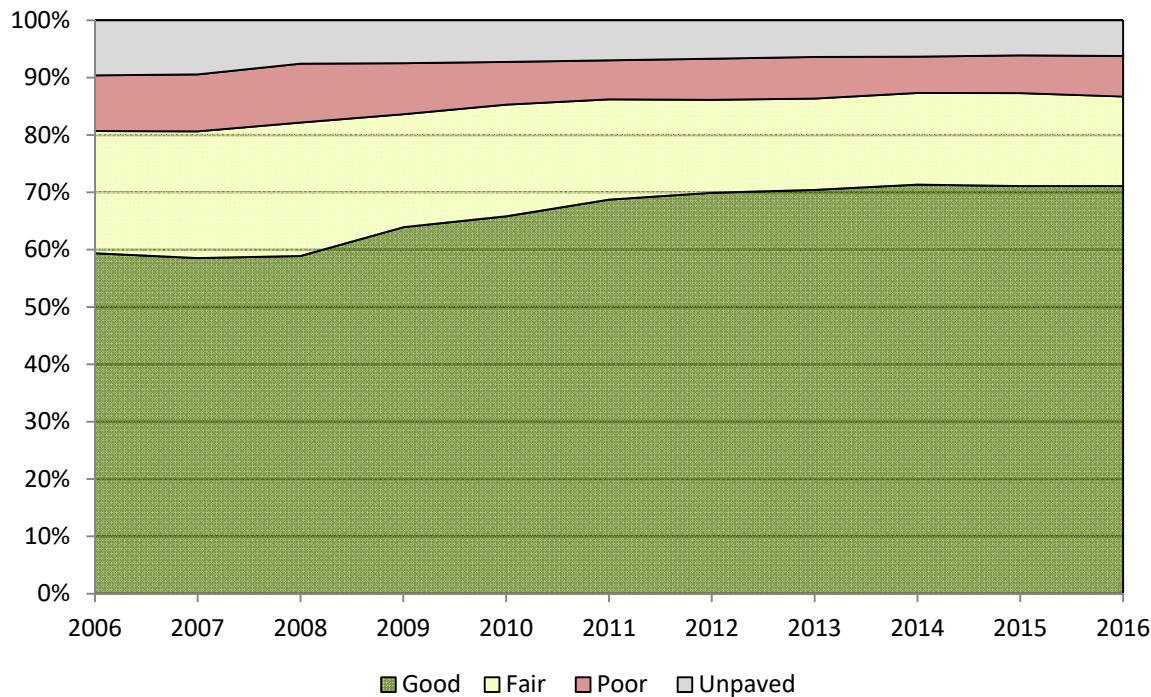

Northern and Remote Route Network: Expenditures per Km

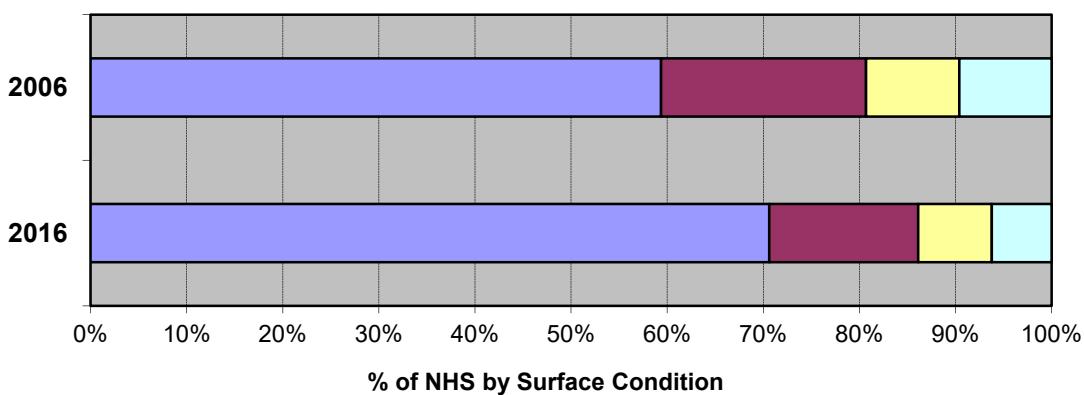

f) Pavement Condition

National Highway System: Surface Condition⁴

	2006	2016	Change
Paved – Good	21,649	25,130	+ 16%
Paved - Fair	7,781	5,514	- 29%
Paved – Poor	3,537	2,728	- 23%
Unpaved	3,501	2,212	- 37%

National Highway System: Surface Condition Changes 2006 vs 2016

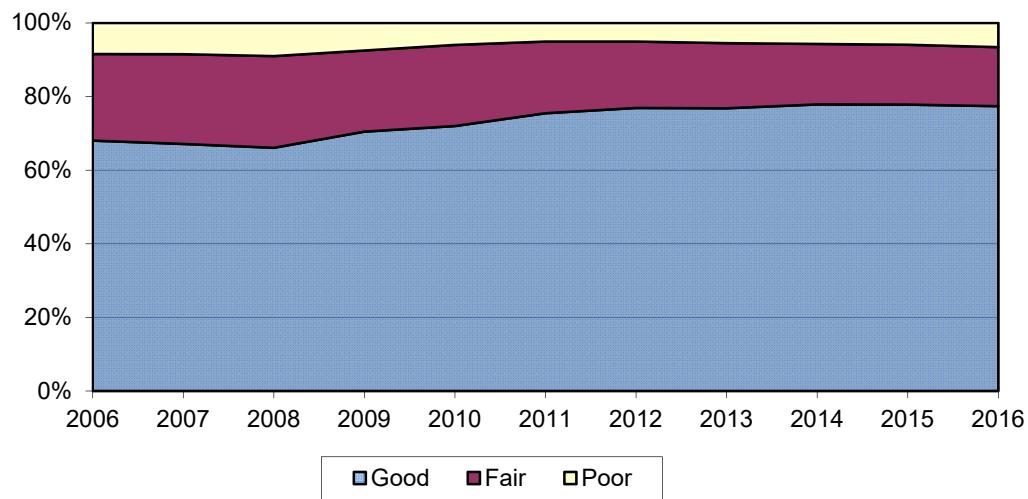

Highlights:

- Since 2012, the condition of pavement surfaces on the NHS has remained relatively unchanged with 71% of the network in “good” condition and 23% in “fair” or “poor” condition.
- About 6% of the NHS remained unpaved in 2016.

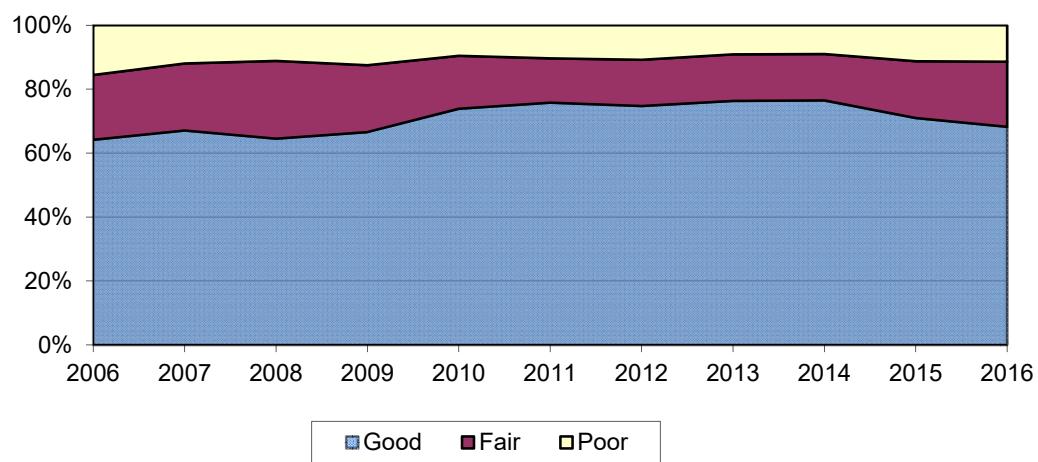

⁴ Pavement condition rating information provided by jurisdictions is not based on identical criteria and thresholds; with some variations in the factors considered and approaches used to classify pavements as good, fair or poor. Totals may not equal the length of the entire NHS as pavement rating data is not available for all sections.

NHS Surface Condition 2006-2016

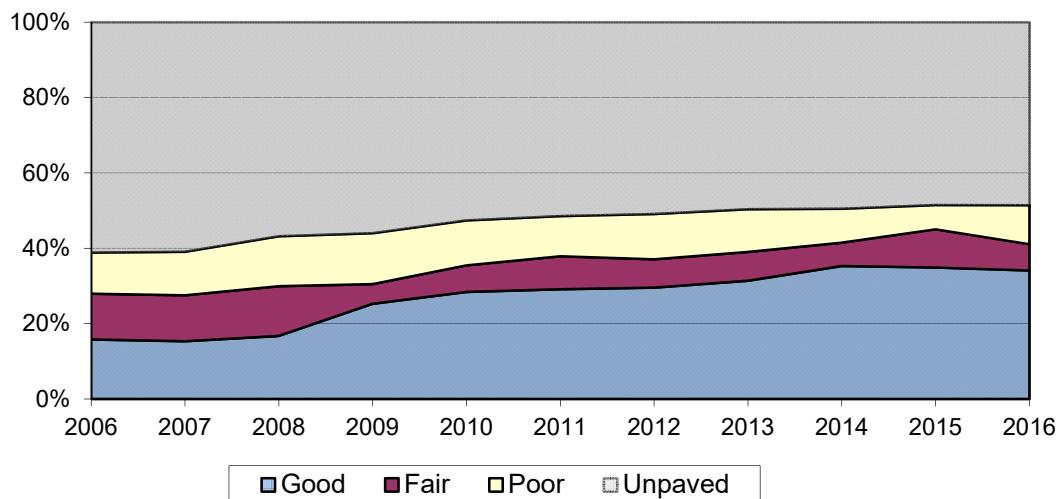

Core Network

Feeder Network

Northern and Remote Network

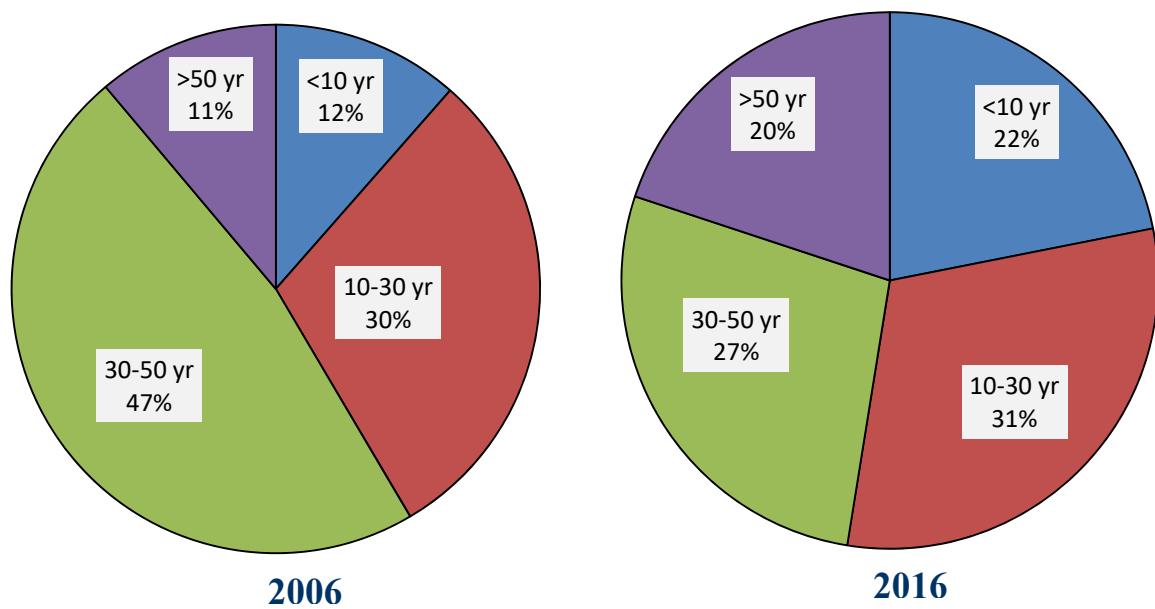

g) Bridges and Structures

Number of Bridges and Structures on the NHS⁵

	2006	2016	Change
Core	6,676	9,267	+ 39%
Feeder	832	920	+ 11%
Northern/Remote	302	451	+ 49%
Total	7,810	10,626	+ 36%

NHS Bridges and Structures:
Inventory Age Profile 2006 vs. 2016

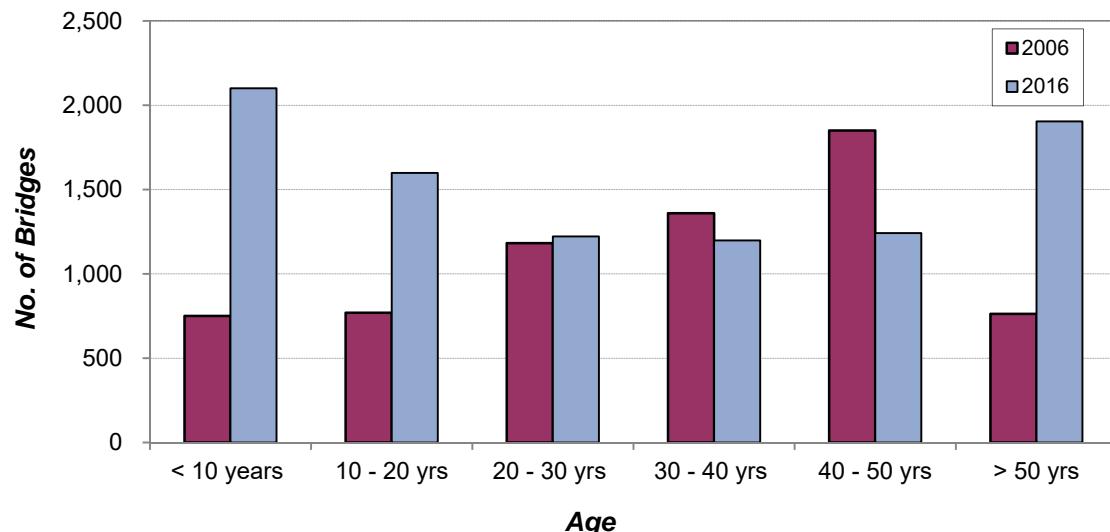

Highlights:

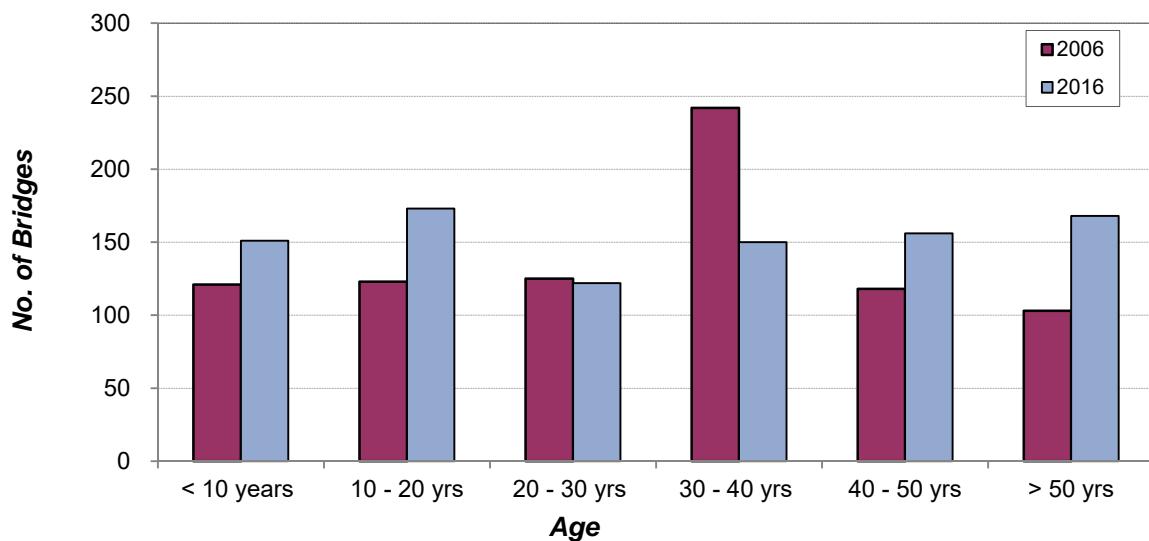

- Over the period 2006-2016 the number of bridges and structures reported on the NHS increased by 36% (due in part to adoption of a common definition and changes in the bridge inventory systems maintained by governments)
- The number of bridges that are less than 10 years old doubled from 2006 (896) to 2016 (1,873) as a reflection of increased investment and new construction.
 - Nearly 1200 bridges are new or have had major rehabilitation work since 2007.
- The number of bridges that are over 50 years old more than doubled from 2006 (870) to 2016 (2,117).

⁵ Includes all bridges and structures with a span greater than 3.0 m (including large culverts)

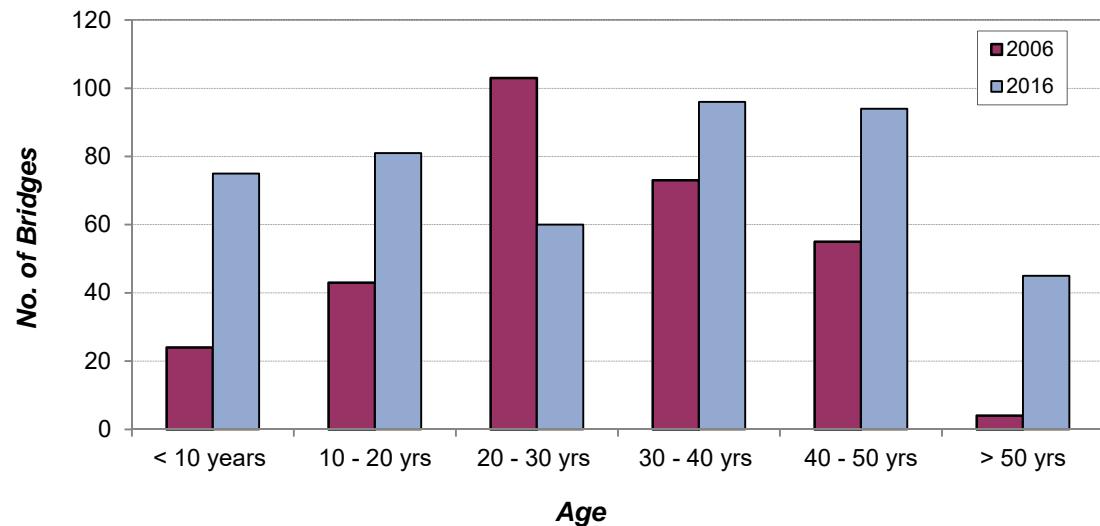

NHS Core Routes: Bridge Age Profile

NHS Feeder Routes: Bridge Age Profile

NHS Northern and Remote Routes: Bridge Age Profile

Part 2: National Highway System – Data by Jurisdiction

National Highway System Length (December 2016)

Jurisdiction	Core Network (km)	Feeder Network (km)	Northern & Remote Network (km)	Total (km)
Yukon	1,068.6		947.9	2,016.5
Northwest Territories	575.6		847.2	1,422.8
Nunavut				
British Columbia	5,869.3	446.7	724.0	7,040.0
Alberta	4,065.9	215.5	196.5	4,477.9
Saskatchewan	2,452.3		236.3	2,688.6
Manitoba	985.1	741.9	368.2	2,095.2
Ontario	6,147.1	647.7		6,794.8
Québec	3,442.2	770.5	1434.7	5,647.4
New Brunswick	994.5	807.2		1,801.7
Prince Edward Island	208.7	189.5		398.2
Nova Scotia	904.7	294.3		1,199.0
Newfoundland and Labrador	1,007.6	298.0	1161.0	2,466.6
Total NHS Length (km)	27,721.6	4,411.4	5,915.8	38,048.7

The length information is based on the centerline distance of a roadway between start and end points (rather than lane-kilometers or “two-lane equivalent” lengths).

National Highway System – Surface Condition

2016

⁹ Pavement condition rating information provided by jurisdictions is not based on identical criteria and thresholds;

- Transports Québec does not normally use the categories of “Good”, “Fair” and “Poor”. The thresholds used to differentiate “Good” from “Fair” are not used in Quebec, and the thresholds to differentiate “Fair” from “Poor” are based on thresholds for intervention, which vary from one class of road to another.

- Saskatchewan and Manitoba use only two pavement condition rating categories; “Good” and “Poor”.

¹⁰ In some cases the cell totals for "good, fair, poor and unpaved" do not add up to the total length of NHS in each jurisdiction, primarily because pavement rating data was not available for some sections

¹¹ NB data is from 2015
