

Territorial Developments Round Table Report

Task Force on Vehicle Weights and Dimensions Policy

Yukon Update

- Maintenance being done on various bridges as part of long-term infrastructure upgrades program.
 - The bridge and approach on the Alaska Highway over ‘Big Creek’ is being replaced and the highway is being straightened.
- A review of Front-Axle overload permits is underway and will be rolled out in the New Year. This permitting reviews brings us in-line with other jurisdictions on use of wide base tires.
- The global pandemic has severely reduced traffic and the movement of extreme loads due to mining industry delays in starting up and difficulty getting staffing into Yukon. Yukon has been focused on Pandemic response and most projects have been shelved for the year.
- With winter is in full swing in Yukon we have entered our slower season for projects and traffic.
